

Gateway Programme

Pharmaceutical Sciences

Introduction

The aim of the Integrated Master's Degree in Dentistry is to develop the scientific and technical capabilities required to prevent and treat mouth diseases, and rehabilitation.

With generalist training and eminently practical teaching, Dentists who graduate from the Egas Moniz School of Health and Science are qualified to exercise their profession with competence and professionalism.

Why you should apply?

1. Strong practical component

With more than 1,000 hours of clinical practice with patients and about 233 clinical acts per student.

2. Modern facilities

Large, modern and well equipped laboratories where you will make use of the most advanced technologies, equipment and dental materials.

3. University Clinic Egas Moniz

From the 4th year of the course you will carry out an important part of your learning and training, you will have Integrated Clinic in the last semester of the Master and you will use the most recent and innovative materials and techniques in Dentistry.

How does it work?

Guaranteed access to the 2nd year of the programme:

After the successful completion of 30 ECTS, the student gains direct access to the 2nd year of the study cycle.

Duration and academic periods:

Gateway Access Spring (March-July)

Gateway Access Fall (September-January)

Online or on-campus learning:

At the student's choice, ensuring sufficient time to arrange visas and relocation without missing classes.
